Lightweight, superior performance
for multiple applications

MICORE® Brand
Mineral Fiber Board
Uncover the Possibilities. As a substrate or core, MICORE® Brand Mineral Fiber Board from USG complements your design with quality and superior performance. For use in a variety of applications—from tackboards, wall panels, office dividers and baffles to stove boards, containers, chalkboards and roofing—MICORE Brand Mineral Fiber Board products deliver the versatility and performance you need for your next project.
Applications

Partitions
Office dividers
Wall panels
Tackboards
Chalkboards
Stove boards
Roofing
Sound deadening
Benefits

Superior performance

- **Dimensional stability** Inorganic mineral fibers resist moisture to minimize expansion and warpage
- **Superior machinability** Cuts quickly and easily to size and shape specifications using standard equipment; adapts readily to design innovations
- **Exceptional tackability** Accepts tacks with excellent hold down ability
- **Ideal versatility** Laminates easily to a variety of finish materials

Outperforms particle and other wood fiber boards

- Nearly 50% lighter than particle board for easy handling
- Simple component assembly
- Lower freight rates
- Class A flame spread ratings developed per ASTM E84; UL classified
- STC ratings developed per ASTM E336-90; classified in accordance with ASTM E413-87
### The right board for any application

<table>
<thead>
<tr>
<th>MICORE 300</th>
<th>MICORE 300 Board does it all. It's a superior substrate for fabric and vinyl-covered wall panels, office dividers and tackboards, and an excellent core for chalkboards, stove boards and other similar applications. With outstanding resilience, superior machinability, and high density, <strong>MICORE 300 Board</strong> has the best surface hardness of any <strong>MICORE</strong> board. The board’s smooth surface laminates easily with various finish materials such as vinyl, fabrics and steel. It is compatible with most water- or solvent-based adhesives.</th>

<tr>
<td>MICORE 160</td>
<td>For superior performance plus savings, <strong>MICORE 160 Board</strong> adapts to a variety of design applications. Ideal for open plan partitions, office screens, dividers, tackboards and various other applications. The board combines lightweight properties with the strength and stability of heavier boards. And that means easier handling, simplified assembly and lower freight rates. <strong>MICORE 160 Board</strong> also has good sound control, reducing noise in open plan interiors.</td>

SAFETY FIRST!

Follow good safety and industrial hygiene practices during handling and installing all products and systems. Take necessary precautions and wear the appropriate personal protective equipment as needed. Read material safety data sheets and related literature on products before specification and/or installation.

Note

Products described here may not be available in all geographic markets. Consult your U.S. Gypsum Company sales office or representative for more information.

Trademarks

The following trademarks used herein are owned by United States Gypsum Company or a related company: Micore, USG.

Notice

We shall not be liable for incidental or consequential damages, directly or indirectly sustained, nor for any loss caused by application of these goods not in accordance with current printed instructions or for other than the intended use. Our liability is expressly limited to replacement of defective goods. Any claim shall be deemed waived unless made in writing to us within thirty (30) days from the date it was or reasonably should have been discovered.

The International Agency for Research on Cancer has classified respirable crystalline silica as a probable human carcinogen (Group I) and MMMF as a possible human carcinogen (Group 2B). Product safety information: 800-507-6899. KEEP OUT OF REACH OF CHILDREN.

Warning

Overexposure to dust can cause eye, skin, nose, throat or respiratory irritation. Wear eye, skin, and respiratory protection. Cut and trim with knife, razor or handsaw. Do not cut with power equipment unless a dust collector is used on the equipment or local exhaust is used and an NIOSH/MSHA-approved respirator is worn. Failure to follow these instructions may result in overexposure to airborne man-made mineral fiber and silica.
